

January 3rd, 2023

Dear Resident,

Delivering safe, reliable energy is an Eversource top priority. In keeping with that commitment, Eversource is improving the natural gas distribution system in your Longmeadow neighborhood, beginning the week of January 9th, 2023, and continuing through approximately June 2023. As we perform our work, we are continuing to follow the guidance issued by federal, state, and regulatory officials concerning certain job tasks during the coronavirus health crisis. To learn more about the precautions Eversource and its contractors are taking to protect the safety of customers and employees, please see page 2.

What You Can Expect While We are In Your Neighborhood

Working together is important to the successful and timely completion of this project. NPL Construction will be performing the work in your neighborhood on behalf of Eversource. Construction activities will generally take place Monday through Friday, and occasionally on Saturdays, between 7 a.m. to 4:30 p.m. Our work is weather dependent, and construction activities are subject to change. All Eversource employees, contractors and field representatives carry identification they will gladly share with you. Construction will take place on the following streets:

- Bliss Rd
- Burbank Rd
- Blokland Dr
- Oakwood Dr

If you are an Eversource gas customer, our work will include moving your natural gas meter outside, replacing your existing gas service line, and installing curb valves at the street. There may also be other upgrades required to ensure the safe and most efficient operation of the natural gas distribution system.

This work will result in a temporary interruption to your natural gas service. Please be assured, however, that prior to any interruption, you will be contacted in advance so that you can plan accordingly. At the conclusion of any gas service interruption, Eversource representatives will turn your natural gas meter back on, re-light all your natural gas appliances and perform a safety check. We will do our best to minimize any disruptions.

Our Commitment to You

We are committed to being good neighbors and performing our work with utmost respect for you and your property. As construction professionals, we also know that living within a work zone can be challenging.

Always Working to Serve You Better

If you have any questions or need any additional information regarding this important upgrade work, please contact me or Mike Carter, NPL Construction Superintendent. We thank you for your patience and cooperation as we work together to complete this gas system improvement project.

Sincerely,

Greg Gallant

Eversource Gas Construction Supervisor
